# PREFACE

Dear customers,

You now hold in your hands the freshly printed, latest edition of our "Würth" complete catalog. I am delighted to present to you our high-quality products on more than 3,800 pages. We again included many new and innovative products.

The following chapters provide you with detailed information on our extensive product range, allowing you to gain deep insight into the varied world of Würth products – from individual products and their features to technical details. And this applies to more than 100,000 products for customers in industry and trade.

More than three million customers trust in our products, our quality and our service. To live up to the confidence placed in us, more than 30,000 sales representatives in more than 80 countries are on the road every day to attend to our customers, providing qualified advice and fast deliveries. Apart from extending the sales organization, the opening of further branch offices is planned to cover the immediate needs of craft customers. By now, there are more than 1,100 of them worldwide. Furthermore, it is our aim to do justice to the increasing demands every day anew. The Würth Group is always striving

to keep up its innovative power: 40% of Adolf Würth GmbH & Co. KG's sales volume are generated with products not older than five years.

We turned from a screw supplier into a specialist in assembly technology which does not only excel by competence, but also by customer orientation and closeness to the customers. We offer solutions tailored to your needs.

I hope you will enjoy flicking through the catalog and am absolutely convinced that we have the right answer to all your product inquiries.

Kind regards,

A handwritten signature in black ink that reads "R. Friedmann". The signature is fluid and cursive, with a long horizontal stroke at the end.

Robert Friedmann  
Chairman of the  
Central Managing Board  
Würth Group

# PARTNER OF THE

The Würth Group is represented by over 400 legally independent sales companies

## To each customer their own Würth

Tradespeople and medium-sized companies have always strongly focused on the individual needs of the customers. We have adopted this attitude and you will benefit from it. Our daily cooperation helps us finding new approaches for improvements. We aim at supplying every customer with every article at any time in any place. We therefore developed modular system logistics tailored to the individual needs of the customers. In October 2009, we won the German Logistics Award for this concept.

## Würth is quality

The employees in our own laboratories ensure that we can live up to our quality standards. Our colleagues in product development constantly check our customers' requests and develop high-end products on the basis of this information.

## About 3 million customers

Worldwide, over 400 companies of the Würth Group in 84 countries guarantee that our customers can rely on our high quality, excellent service and innovative power.

# THE CUSTOMER

in 84 countries and has over 66,000 employees on its payroll.

## Over 66,000 employees worldwide

More than half of them working as sales representatives in the field and offering you the best possible service and competent consulting.

## 100,000 products and dimensions

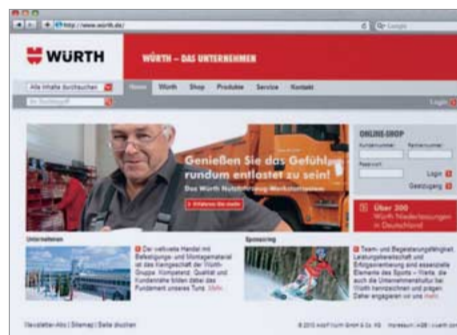

are suited to the needs of our customers in industry and trade. Würth offers you as our customer a comprehensive product package – all in one.

## Online – always up-to-date

The Würth catalog available on the internet (WüKO) informs you about all products and gives you the possibility order online. You thus have access to the entire range and can save time – also available in English!

## The brands

Our name is a promise: best quality, best service, highly motivated employees. This has been our maxim for more than 65 years.

### ASSY

The chipboard screws with innovative drive to meet the most exacting demands – meanwhile a classic.

### ORSY

Well thought-out storage and retrieval systems offer ORder and a SYstem for better overview, direct access and safe storage.

### master

The strong line of power tools, battery-operated tools and compressed air tools as well as excellent service for professional users.

### ZEBRA

This top quality brand offers solutions to specific problems, maximum economy in use, functionality and long service life.

# PARTNER OF SPORTS

**Big sports events have always captivated us and will also fascinate us in future, for more than 35 years.**

## Sports sponsoring

Team spirit, enthusiasm, motivation and success-oriented thinking are essential in the world of sports. These values perfectly describe Würth's corporate culture, which is why we are deeply involved in sports sponsoring.

Sports sponsoring has a long tradition at Würth. Our first partnership in motorsports dates back to 1976.

- Since 1976** Motorsports
- Since 1987** Fencing
- Since 1991** Soccer
- Since 2000** DTM
- Since 2002/2003** Winter sports

## Soccer

In many European countries, soccer is still "almost the best thing in the world". On account of the growing internationalization of the Würth company, we increasingly focused on soccer, starting with touchline advertising in 1991.

## Motorsports

### Würth – partner of the DTM

Since many years we are present at the DTM (Deutsche Tourenwagen-Masters). DTM fans are intrigued by the 400 hp cars and the great sport that is offered. Within the pits of our partner Audi, one mainly works with Würth tools and also the implemented assembly and care products are preferably bought from us. This is why all Audi cars wear our logo at the C-pillar.

# SPORTS

which is why the Würth Group has supported competitive sports

## Fencing

As the official sponsor and partner of the Olympic training center in Tauberbischofsheim, Germany, the Würth company also supports sports in the Hohenlohe and Franconia regions. The international Reinhold Würth Women's Épée World Cup has taken place in Germany's fencing capital of Tauberbischofsheim since 1987. This cup is the annual fencing highlight. In 1999, the fencing club Künzelsau was founded. It supports children and youth from the Hohenlohe Region in their fencing activities. The club has meanwhile turned into a top club for up-and-coming talents in saber fencing in Germany.

## Winter sports

**Würth and the DSV**

"It all depends on the right technique" – this has been the motto of the partnership between the German Ski Association (DSV) and Adolf Würth GmbH & Co. KG from its inception in the 2002/2003 season. Be it in winter sports or at Würth, in order to be successful you need to have the right technique. However, this also means continuously developing further and being open for innovation so that you are a step ahead of the competition at the end of the day.

## Special Olympics

**Würth supports Special Olympics**

Special Olympics enables people with intellectual disabilities from all over the world to show their abilities in sports and to gain self-confidence, social acceptance and the infinitely valuable feeling of being respected.
